Creative, driven, analytical and a team player. That's Jasper in a nutshell. I like to delve into the puzzles that come along and look for the most practical solution for the situation. As a Developer, I get energy from iteratively setting up and/or refactoring an application or landscape. By not losing sight of the ultimate goal of the various stakeholders, I strive to program solid code and intuitive interfaces.

"Happiness comes from solving problems"

WORK EXPERIENCE

Webshop owner

TheDigitalProblemSolver, Echt

Sept 2023 - Present

Independent webshop owner and technical further development of the platform.

Career break
